Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law. Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures, and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy-makers, and practitioners in the field.

The interdisciplinary field of smart digital systems is crucial to modern computer science, encompassing artificial intelligence, information systems and engineering. For over a decade the mission of KES International has been to provide publication opportunities for all those who work in knowledge intensive subjects. The conferences they run worldwide are aimed at facilitating the dissemination, transfer, sharing and brokerage of knowledge in a number of leading edge technologies. _x000D_ This book presents some 80 papers selected after peer review for inclusion in three KES conferences, held as part of the Smart Digital Futures 2014 (SDF-14) multi-theme conference in Chania, Greece, in June 2014. The three conferences are: Intelligent Decision Technologies (KES-IDT-14), Intelligence Interactive Multimedia Systems and Services (KES-IIMSS-14), and Smart Technology-based Education and Training (KES-STET-14). _x000D_ The book will be of interest to all those whose work involves the development and application of intelligent digital systems.
