How did Joe Haldeman's Camouflage beat Susanna Clarke's monumental work Jonathan Strange and Mr. Norrell for the Nebula Award in 2005? Granted, I haven't read that book, but I have read many glowing reviews from my fellow FanLit reviewers and Goodreads friends. It was also made into a major BBC miniseries and received many accolades.

Offered the choice of retaining his individuality or becoming part of the genetically modified shared Human hive-mind, Mandella chose exile, joining other veterans of the Forever War seeking a new life on a wasteland world they called Middle Finger. Making a home for themselves in this half-frozen hell, Mandella and his life partner, Marygay, have survived into middle age, raising a son and a daughter in the process. Now, the dark truth about the colonists' ultimate role in the continuation of the Human group mind will force Mandella and Marygay to take desperate action as they hijack an interstellar vessel and set off on a

that changed him and colored much of what he has written. War Year is Haldeman's first novel and his first attempt to describe what he saw in Vietnam and give insight into what happened for the benefit of those who weren't there. The minimalist War Year follows the life of John Farmer, a combat engineer, over the course of a year in Vietnam. John undergoes training, and then, along with his fellow soldiers, does whatever it takes to survive in unforgiving conditions. Powerful and affecting, War Year reaches its highest peaks as it describes with enduring truth the sights and experiences of what it was like to be in the humid jungles of Vietnam in 1968. This ebook features an illustrated biography of Joe Haldeman including rare images from the author's personal collection.
