Sewage Treatment Plants: Economic Evaluation of Innovative Technologies for Energy Efficiency aims to show how cost saving can be achieved in sewage treatment plants through implementation of novel, energy efficient technologies or modification of the conventional, energy demanding treatment facilities towards the concept of energy streamlining. The book brings together knowledge from Engineering, Economics, Utility Management and Practice and helps to provide a better understanding of the real economic value with methodologies and practices about innovative energy technologies and policies in sewage treatment plants.

This book is primarily intended to serve as a research-based textbook on sustainable supply chains for graduate programs in Business, Management, Industrial Engineering, and Industrial Ecology, but it should also be of interest for researchers in the broader sustainable supply chain space, whether from the operations management and industrial engineering side or more from the industrial ecology and life-cycle assessment side. Finding efficient solutions towards a more sustainable supply chain is increasingly important for managers, but clearly this raise difficult questions, often without clear answers. This book aims to provide insights into these kinds of questions for students and practitioners, based on the latest academic research.

Examines traditional safeguards against mistaken eyewitness identification.

Presents an introduction to the open-source electronics prototyping platform.

Structured Computer Organization is a bestselling text that provides an accessible introduction to computer hardware and architecture. The book takes a modern structured, layered approach to understanding computer systems.

This book presents the work and development of endourology and the contribution of East Asian Society of Endourology. This book is intended to familiarize the modern urologists with the common endourology, laparoscopic and robotic urologic procedures and the development of technology, techniques and training. The book is the collection of papers and presentations in Congress of East Asia Society of Endourology. Recognized experts in the field of endourology have contributed to share their experiences and opinions. It consists of latest update and advancement of surgical techniques, technology in minimal invasive surgery. The development of endoscopic, laparoscopic and robotic urological operations is reviewed. A whole session is dedicated to training in endourology are included. Detail descriptions of perioperative preparation, step-by-step surgical procedures and tips/tricks will be emphasized in the corresponding chapters, supplemented by photographs and illustrations. In the first session, techniques on kidney, bladder and prostate surgeries are discussed. In the second session, is dedicated to the advances of new technologies in endourology. The third session covers the important areas of endourology training and the development of endourology. This book is most suitable for urology residents and young fellows who are keen to start their endourological training. It also provides up-to-date information on current topics of endourology for practicing urologists and experienced endourologists.

This text is designed to provide a comprehensive and state-of-the-art overview of the major issues specific to technological advances the field trauma, critical care and many aspects of surgical science and practice. Care of these patients and clinical conditions can be quite complex, and materials have been collected from the most current, evidence-based resources. The sections of the text have been structured to review the overall scope of issues dealing with trauma, critical care and surgery, including cardiothoracic surgery, vascular surgery, urology, gynecology and obstetrics, fetal surgery and orthopedics. This volume represents the most comprehensive textbook covering a wide range of topics and technological advances including genomics and nanotechnologies that affect patients ' care and surgeons ' practice daily. The multidisciplinary authorship includes experts from all aspects of trauma, surgery and critical care. The volume highlights the dramatic changes in the field including hand held devices and smart phones used in daily medical and surgical practice, complex computers in the critical care units around the world, and robotics performing complex

surgical procedures and tissue engineering. Technological Advances in Surgery, Trauma and Critical Care provides a comprehensive, state-of-the art review of this field, and will serve as a valuable resource for clinicians, surgeons and researchers with an interest in trauma, critical care, and all the specialties of surgery. It provides a concise yet comprehensive summary of the current status of the field that will help guide patient management and stimulate investigative efforts.

In this collection of essays, Bromberger explores the centrality of questions and predicaments they create in scientific research. He discusses the nature of explanation, theory, and the foundations of linguistics.

This text covers the desert battle at Kasserine Pass in February 1943, the first real confrontation between American and German troops and the one that pitted Eisenhower's and Patton's leadership against Rommel's.
