"Changing a child's diet will improve not just their physical health, but also their mental well-being, mood, and cognitive function at a fundamental level. This book highlights the link between nutrition and cognitive function, and demonstrates the crucial role of diet in supporting children with ADHD. Written by an internationally-recognised leader in the growing field of nutritional psychiatry, this book takes a nutrition-based look at ADHD and its management. Combining the latest theory and research with the inspirational stories of a

fifteenth-century editions of medieval authorities, the second spanning the early modern period from the sixteenth to the eighteenth century, and the third focusing on the nineteenth and twentieth centuries. The contributors are scholars from all over the world. Each 'old book' is analyzed by a recognized specialist in the specific field of interest. Individual entries give a short biography of the author and discuss the significance of the works in the time and setting of their publication, and in their broader influence on the development of law worldwide. Introductory essays explore the development of Western legal traditions, especially the influence of the English common law, and of Roman and canon law on legal writers, and the borrowings and

interaction between them. The book goes beyond the study of institutions and traditions of individual countries to chart a broader perspective on the transmission of legal concepts across legal, political, and geographical boundaries. Examining the branches of this genealogical tree of books makes clear their pervasive influence on modern legal systems, including attempts at rationalizing custom or creating new hybrid systems by transplanting Western legal concepts into other jurisdictions.
