Written by a senior examiner, Rachel Cole, this Edexcel AS Economics Student Unit Guide is the essential study companion for Unit 2: Managing the Economy. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index, examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required and exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade.

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Arranged in four sections, provides review exercises and past examination questions for topics in microeconomics, macroeconomics, interantional economics, and development economics.

This product accompanies: Pindyck & Rubinfeld, Microeconomics, 8/EFor undergraduate and graduate economics majors who are enrolled in an Intermediate Microeconomics course. A book that provides a treatment of microeconomic theory that stresses the relevance and application to managerial and public policy decision making.This edition includes a number of new topics, updated examples, and improved exposition of existing materials

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--
