!Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

Words-only edition. A treasury of 250 favorite choruses.

The Salvation Army is today one of the world's best-known and best-regarded religious and charitable movements. In this deeply researched study, Norman Murdoch offers some surprising new insights into the denomination's origins and its growth into an international organization. Murdoch follows the lives and work of the Army's founders, William and Catherine Booth, from their beginnings as Wesleyan evangelists in the 1850s to their inauguration of a Utopian social plan in 1890. In particular, Murdoch identifies quick accommodation to failure as a persistent theme in the Army's early history. When the Booth's East End mission faltered in the mid-1870s, Booth took his preaching to the provincial towns. The failure of that ministry led him in 1878 to reorganize his efforts along then-popular military lines, and the Salvation Army was born. With women as its "shock troops," this Christian imperium would spread beyond Britain's boundaries to become as international in scope as Victoria's empire. Challenging various notions popularized in the denomination's official histories, this book will be of special interest to historians of nineteenth-century social reform, scholars of evangelical Protestantism, and readers interested in the relationship between class and religion in the Anglo-American world.

This work attempts to classify and cite all the literature in English about and by The Salvation Army, from Booth's Darkest England to Shaw's Major Barbara. Approximately 5000 titles are arranged chronologically, by nine subjects, three of which are further subdivided by specific topic.
