professional engineers, as well as students at university and further education colleges. All users of the IET Wiring Regulations need to be aware of the coming changes in the 18th Edition (BS 7671:2018). This is intended to come into effect on 1st January 2019, although industry needs to start preparing for this from its point of publication (2nd July 2018).

changes and providing real solutions to the problems that can often occur with practical interpretation. Written and developed by the Electrical Contractors' Association, Guide to the Wiring Regulations brings a wealth of experience to the subject and offers clear explanations of the changes in the standard. Starting with full coverage of the legal requirements the book then goes on to: provide extensive advice on circuit design, selection and erection, wiring systems, earthing and bonding; explore the additional requirements of the Standard for protection against voltage disturbances and implementation of measures against electromagnetic influences (EMC); elaborate on the alterations to the inspection and testing requirements; feature practical information on the new special

locations included in the 17th Edition, particularly exhibitions, shows and stands, floor and ceiling heating systems, mobile or transportable units and photovoltaic power systems; highlight the changes made in the new edition to existing special locations, including bathrooms, swimming pools, agricultural and horticultural premises and caravan/camping parks. Guide to the Wiring Regulations is an outstanding resource for all users of the 17th Edition IEE Wiring Regulations (BS 7671: 2008) including electricians who want a better understanding of the theory behind the Standard, electrical technicians, installation engineers, design engineers, and apprentices. Both trainees and practitioners will find this guide indispensable for understanding the impact of the changes introduced

A guide to electrical isolation and switching. It is part of a series of manuals designed to amplify the particular requirements of a part of the 16th Edition Wiring Regulations. Each of the guides is extensively cross-referenced to the Regulations thus providing easy access. Some Guidance Notes contain information not included in the 16th Edition but which was included in earlier editions of the IEE Wiring Regulations. All the guides have been updated to align with BS 7671:2001.

and brief explanations, all elements of building services. Practice, techniques and procedures are clearly defined with supplementary references to regulations and relevant standards. This is an essential text for all construction/building services students up to undergraduate level, and is also a valuable reference text for building service professionals. This new book is based on Fred Hall's 'Essential Building Services and Equipment 2ed' and has been thoroughly updated throughout. It is a companion volume to the highly popular textbook 'Building Construction Handbook' by Chudley and Greeno, which is now in its fourth edition.
