knowledge needed to present the magic of cinema to an enthralled audience. Part manual and part manifesto, this book compiles more than fifty years of expertise from the staff of the world-renowned George Eastman Museum and the students of the L. Jeffrey Selznick School of Film Preservation into the most authoritative and accessible guide to film projection ever produced. No film comes to life until it is shown on the big screen, but with the proliferation of digital movie theaters, the expertise of film projection has become rare. Written for both the casual enthusiast and the professional projectionist in training, this book demystifies the process of film projection and offers an in-depth understanding of the aesthetic, technical, and historical features of motion pictures. Join in the fight to save the authentic experience of seeing motion pictures on film.

Macromedia's Flash 8 is the world's premier program for adding animation to websites. special effects and audio, video, and interactivity to your presentations. When you're really feeling steady, the book shows how to use a dollop of ActionScript to customize your content. It then teaches you how to publish your Flash creations for web surfers everywhere to enjoy. Along the way, the book shows you good design principles and helps you avoid elements that can distract or annoy an audience. Author Emily Vander Veer has more than a dozen books to her credit, including titles on web design and scripting--most written for non-technical readers. Her background makes her the perfect author for a straightforward book on a complex subject. She takes Flash 8: The Missing Manual from the basics to the advanced, yet avoids a hasty jump into tough topics that can leave readers confused. Not only will Flash 8: The Missing Manual help you turn a concept into unique, dynamic content, but it will continue to serve as a reference as you develop your website.
