The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development. The Minerals Yearbook includes chapters on approximately 90 commodities and over 175 countries. This volume of the Minerals Yearbook provides an annual review of mineral production and trade and of mineral-related government and industry developments in more than 175 foreign countries. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook.

This book is a direct companion to Sittig's Handbook of Toxic and Hazardous Chemicals and Carcinogens in that the hazardous chemicals listed in Sittig's Handbook are the source for this guide. With more than 7,500 entries highlighting chemical producers worldwide, this international directory is a source of complete contact information for manufacturers, agencies, organizations, and useful sources of information regarding hazardous chemicals.

Sittig's Handbook of Pesticides and Agricultural Chemicals is specifically designed for use by those engaged in the agricultural and food processing industries, both vital to our nation's health and economy. People in every phase of food production, from the farm to the fork, will find a wealth of material here. It will also be of interest to professionals in the pharmaceutical, cosmetics, and personal care industries who use agricultural products as ingredients. It provides crop, chemical, regulatory, health and safety information on nearly 800 pesticides, fertilizers, and other agricultural chemicals. These chemicals are organized with unique identifiers so that all who may have contact with or interest in them can find critical information quickly.

The international financial crisis in 2008 marked the beginning of important changes in the international economic system. The emerging market economies are increasingly becoming a driving force for the global economic growth. Under such circumstances, the Sino-Latin American economic and trade cooperation has entered a new period of historical opportunity. Based on the economic development trend and the adjustment of policy, this book explores the prospect for Sino-Latin American economic and trade cooperation. It tracks the development path for this cooperation in the next 10 years by analyzing resource endowment, industrial structure, economic system, development pattern, basic economic policy, economic environment, economic and trade relations between China and Latin America .

South America, Central America and the Caribbean 2002has been thoroughly revised and updated by Europa's experienced editorial team. The information included is as invaluable to those who know little of the region as it is to the seasoned businessman or academic. It should be in the reference collections of public and academic libraries, international organizations, trade and industrial companies, diplomats, government and the media. Containing a wealth of up-to-date information on the 48 countries and territories of the region, this reference provides a unique perspective on the region with its exhaustive collection of facts, up-to-date statistics, extensive directory details and expert comment.
