In 1916, a polio outbreak in New York City quickly spread to adjacent states. Despite intensive sanitation measures of the kind that had helped control other epidemic diseases such as cholera and typhoid fever, 27,000 people died that summer. In New York City, 80 percent of those who died were under five.

A history of the 1950s polio epidemic that caused panic in the United States examines the competition between Salk and Sabin to find the first vaccine and its implications for such issues as government testing of new drugs and manufacturers' liability.

Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure, from the March of Dimes to the discovery of the Salk and Sabin vaccines--and beyond. Drawing on newly available papers of Jonas Salk, Albert Sabin and other key players, Oshinsky paints a suspenseful portrait of the race for the cure, weaving a dramatic tale centered on the furious rivalry between Salk and Sabin. He also tells the story of Isabel Morgan, perhaps the most talented of all polio researchers, who might have beaten Salk to the prize if she had not retired to raise a family. Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis, which was founded in the 1930s by FDR and Basil O'Connor, it revolutionized fundraising and the perception of disease in America. Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market, and the way in which the legal system dealt with manufacturers' liability for unsafe products. Finally, and perhaps most tellingly, Oshinsky reveals that polio was never the raging epidemic portrayed by the media, but in truth a relatively uncommon disease. But in baby-booming America--increasingly suburban, family-oriented, and hygiene-obsessed--the specter of polio, like the specter of the atomic bomb, soon became a cloud of terror over daily life. Both a gripping scientific suspense story and a provocative social and cultural history, Polio opens a fresh window onto postwar America.

The compelling true story of Dr. Jonas Salk's quest to develop a vaccine for polio. In 1916, the United States was hit with one of the worst polio epidemics in history. The disease was a terrifying enigma: striking out of nowhere, it afflicted tens of thousands of children and left them--literally overnight--paralyzed. Others it simply killed. At the same time, a child named Jonas Salk was born.... When Franklin Delano Roosevelt was diagnosed with polio shortly before assuming the Presidency, Salk was given an impetus to study this deadly illness. After assisting in the creation of an influenza vaccine, Salk took up the challenge. His progress in combating the virus was hindered by the politics of medicine and by a rival researcher determined to discredit his proposed solution. But Salk's perseverance made history--and for close to seventy years his vaccine has saved countless lives, bringing humanity close to eradicating polio throughout the world. *Splendid Solution* chronicles Dr. Salk's race against time to achieve an unparalleled breakthrough that made him a cultural hero and icon of modern medicine.

From a Pulitzer Prize-winning historian comes a riveting history of New York's iconic public hospital that charts the turbulent rise of American medicine. Bellevue Hospital, on New York City's East Side, occupies a colorful and horrifying place in the public imagination: a den of mangled crime victims, vicious psychopaths, assorted derelicts, lunatics, and exotic-disease sufferers. In its two and a half centuries of service, there was hardly an epidemic or social catastrophe--or groundbreaking scientific advance--that did not touch Bellevue. David Oshinsky, whose last book, *Polio: An American Story*, was awarded a Pulitzer Prize, chronicles the history of America's oldest hospital and in so doing also charts the rise of New York to the nation's preeminent city, the path of American medicine from

butchery and quackery to a professional and scientific endeavor, and the growth of a civic institution. From its origins in 1738 as an almshouse and pesthouse, Bellevue today is a revered public hospital bringing first-class care to anyone in need. With its diverse, ailing, and unprotesting patient population, the hospital was a natural laboratory for the nation's first clinical research. It treated tens of thousands of Civil War soldiers, launched the first civilian ambulance corps and the first nursing school for women, pioneered medical photography and psychiatric treatment, and spurred New York City to establish the country's first official Board of Health. As medical technology advanced, "voluntary" hospitals began to seek out patients willing to pay for their care. For charity cases, it was left to Bellevue to fill the void. The latter decades of the twentieth century brought rampant crime, drug addiction, and homelessness to the nation's struggling cities—problems that called a public hospital's very survival into question. It took the AIDS crisis to cement Bellevue's enduring place as New York's ultimate safety net, the iconic hospital of last resort. Lively, page-turning, fascinating, Bellevue is essential American history.

Few politicians in our history have had the emotional impact of Joe McCarthy and acclaimed historian David Oshinsky's chronicling of his life has been called both "nuanced" and "masterful." Here, David Oshinsky presents us with a work heralded as the finest account available of Joe McCarthy's colorful career. With a storyteller's eye for the dramatic and presentation of fact, and insightful interpretation of human complexity, Oshinsky uncovers the layers of myth to show the true McCarthy. His book reveals the senator from his humble beginnings as a hardworking Irish farmer's son in Wisconsin to his glory days as the architect of America's Cold War crusade against domestic subversion; a man whose advice if heeded, some believe, might have halted the spread of Communism in Southeast Asia and beyond. *A Conspiracy So Immense* reveals the internal and external forces that launched McCarthy on this political career, carried him to national prominence, and finally triggered his decline and fall. More than the life of an intensely—even pathologically—ambitious man however, this book is a fascinating portrait of America in the grip of Cold War fear, anger, suspicion, and betrayal. Complete with a new foreword, *A Conspiracy So Immense* will continue to keep in the spotlight this historical figure—a man who worked so hard to prosecute "criminals" whose ideals work against that of his—for America.

In this sensitively told tale of suffering, brutality, and inhumanity, *Worse Than Slavery* is an epic history of race and punishment in the deepest South from emancipation to the civil rights era—and beyond. Immortalized in blues songs and movies like *Cool Hand Luke* and *The Defiant Ones*, Mississippi's infamous Parchman State Penitentiary was, in the pre-civil rights south, synonymous with cruelty. Now, noted historian David Oshinsky gives us the true story of the notorious prison, drawing on police records, prison documents, folklore, blues

songs, and oral history, from the days of cotton-field chain gangs to the 1960s, when Parchman was used to break the wills of civil rights workers who journeyed south on Freedom Rides.

"He first full biography of Jonas Salk offers a complete picture of the enigmatic figure, from his early years working on an influenza vaccine--for which he never fully got credit--to his seminal creation of the Polio vaccine, up through his later work to find a cure for AIDS"--

A definitive history of vaccination ranges from Edward Jenner's 1796 creation of the world's first smallpox inoculation to the present day, looking at both the benefits of vaccination as well as the current controversy over their potential neurological side effects and the pharmaceutical companies' emphasis on treatment rather than prevention.

Myrna was a vivacious and active youth who at the age of 14 was paralyzed from her waist down by polio in 1951. This is an inspiring story of how faith, positive attitude, persistence, and the unconditional love and support of family and a community led to her miraculous recovery from polio.
