The Scania K124 is a rear-engined bus built by Scania AB of Sweden with 12-litre engine (Scania DSC12 Euro II or later Scania DC12 Euro III), coupled to a Scania manual or automatic transmission. It could be built as a coach (K124EB) or an intercity bus (K124IB).

This scholarly and clear-sighted book ... is a happy marriage of history and technology and deserves to become standard reading for serious students of the First World War.' Prof. Richard Holmes 'Fascinating. Excellent pictures and a readable text as well. A wonderful story well told.' Military Illustrated 'The Devil's Chariots is the best single work on the development, from concept to fielding, of British armour in the First World War... Glanfield is also entertaining in addition to being enlightening... The Devil's Chariots is a decent read, and for specialists in the field it will be required reading... The research is both broad and solid, and it appears that this will be the last word on this topic for some time to come.' Robert L. Bateman, contributor to The Journal of Military History, Lexington VA, and a member of the Society for Military History 'This book is in a class of its own ... it brings a new maturity to the study of the tank, most particularly from the human perspective, and best of all, it is very readable'. David Fletcher, Senior Archivist, Tank Museum, Bovington, author of 'The Tank. This volume would be a great addition to the library of anyone wishing to try to understand World War I better. I greatly enjoyed this evidently well-researched and highly interesting book... It taught me much. I am grateful.' Royal Naval Sailing Association Journal 'Fascinating ... all military procurement officers should read it... All this is excellently set out, especially the people who made [the tank weapon] possible and those who resented such new ideas.' Brig Fraser Scott, contributor to The Journal of the Royal Artillery Institution 'John Glanfield sheds new light on the tank's pioneers, their bizarre experimental machines and later triumphs... This intensely researched work ... is drawn from previously unpublished primary sources.' Gun Mart 'This is classic research by a world authority.' 'The Driffeld Post 'The author has a sharp eye for detail ... an exemplary history of a pivotal aspect of the First World War.' Worcester Evening News 'The Devil's Chariots can fairly claim to be the most intensively researched and detailed account of the tank's origins yet to appear.' Classic Arms & Militaria 'John Glanfield has combined meticulous historical research with a gift for narrative to present a story that both students of the Great War and the general reader will find fascinating. I thoroughly recommend this book.' John Gregory, contributor to The Journal of the Henry Williamson Society 'The Devil's Chariot is the product of six years of research by author John Glanfield, who wanted to tell the story of the birth of the tank in World War I, and, importantly, the men behind it. Based on personal recollections and official reports Glanfield uncovers the British tank pioneers and their odd machines, the men who supported the new weapon, those who refused to accept their worth and the brave crews who took them into battle.

Offers step-by-step instructions on how to develop personalized custom controls for Delphi applications, and provides detailed coverage on flexible VCL component architecture, debugging, and Object-Oriented Programming. Original. (Advanced)

Issues in Medical Chemistry / 2012 Edition is a ScholarlyEditions® eBook that delivers timely, authoritative, and comprehensive information about Medicinal Chemistry. The editors have built Issues in Medical Chemistry: 2012 Edition on the vast information databases of ScholarlyNews.® You can expect the information about Medicinal Chemistry in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Medical Chemistry: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions® and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

This book is the fourth volume of the sub series of the Lecture Notes in Mobility dedicated to Road Vehicle Automation. Its chapters have been written by researchers, engineers and analysts from all around the globe. Topics covered include public sector activities, human factors and challenges, ethical, legal, energy and technology perspectives, vehicle systems development, as well as transportation infrastructure and planning. The book is based on the Automated Vehicles Symposium which took place in San Francisco, California (USA) in July 2016.
