Offers basic information about astronomy, including its terminology, the best equipment to purchase for stargazing, and images of over one hundred objects to view in the night sky such as star clusters, nebulae, and galaxies.

Volume I of a comprehensive three-part guide to celestial objects outside our solar system ranges from Andromeda to Cetus. Features coordinates, classifications, physical descriptions, hundreds of visual aids. 1977 edition.

Explore the star-studded cosmos with this fully updated, user-friendly skywatcher's guide, filled with charts, graphics, photographs, and expert tips for viewing -- and understanding -- the wonders of space. Stargazing's too much fun to leave to astronomers. In these inviting pages, "Night Sky Guy" Andrew Fizekas takes an expert but easygoing approach that will delight would-be astronomers of all levels. Essential information, organized logically, brings the solar system, stars, and planets to life in your own backyard. Start with the easiest constellations and then "star-hop" across the night sky to find others nearby. Learn about the dark side of the moon, how to pick Mars out of a planetary lineup, and which kinds of stars twinkle in your favorite constellations. Hands-on tips and techniques for observing with the naked eye, binoculars, or a telescope help make the most out of sightings and astronomical phenomena such as eclipses and meteor showers. Photographs and graphics present key facts in an easy-to-understand format, explaining heavenly phenomena such as black holes, solar flares, and supernovas. Revised to make skywatching even easier for the whole family, this indispensable guide shines light on the night sky--truly one of the greatest shows on Earth!

Provides a guide for beginning stargazers, including sky maps and constellation charts, identification tips, and space facts and jokes.

The classic beginner's guide to the southern hemisphere skies, updated to 2010.

Steve O'Meara's guide to the Herschel 400 for amateur astronomers.

Offers a month-by-month guide to the stars and constellations, discusses the history and nature of stars, and describes meteor showers and the positions of the planets.
