On 23 November 1977, an armada of helicopters and airplanes took off from Rhodesian air bases and crossed the border into Mozambique. Their objective: to attack the headquarters of the Zimbabwe African National Liberation Army, where thousands of enemy forces were concentrated. Code named Operation Dingo, the raid was planned to coincide with a meeting of Robert Mugabe and his war council at the targeted HQ. It would be the biggest conflict of the Rhodesian Bush War. In this fascinating account, Ian Pringle describes the political and military backdrop leading up to the operation, and he tells the story of the battle through the eyes of key personalities who planned, led and participated in it. Using his own experience as a jet and helicopter pilot and skydiver, he recreates the battle in detail, explaining the performance of men and machines in the unfolding drama of events. DINGO FIRESTORM is a fresh, gripping recreation of a major battle in southern African military history.

The vicious conflict (1964-79) that brought Robert Mugabe to power in Zimbabwe Expert coverage of the war, its historical context, and its aftermath Descriptions of guerrilla warfare, counterinsurgency operations, and actions by units like Grey's Scouts Amid the colonial upheaval of the 1960s, Britain urged its colony in Southern Rhodesia (modern-day Zimbabwe) to grant its black residents a greater role in governing the territory. The white-minority government refused and soon declared its independence, a move bitterly opposed by the black majority. The result was the Rhodesian Bush War, which pitted the government against black nationalist groups, one of which was led by Robert Mugabe. Marked by unspeakable atrocities, the war ended in favor of the nationalists.

From the searing heat of the Zambezi Valley to the freezing cold of the Chimanimani Mountains in Rhodesia, from the bars in Port St Johns in the Transkei to the Drakensberg Mountains in South Africa, this is the story of one man's fight against terror, and his conscience. Anyone living in Rhodesia during the 1960s and 1970s would have had a father, husband, brother or son called up in the defense of the war-torn, landlocked little country. A few of these brave men would have been members of the elite and secretive unit that struck terror into the hearts of the ZANLA and ZIPRA guerrillas infiltrating the country at that time - the Selous Scouts. These men were highly trained and disciplined, with skills to rival the SAS, Navy Seals and the US Marines, although their dress and appearance were wildly unconventional: civilian clothing with blackened, hairy faces to resemble the very people they were fighting against. Twice decorated - with the Member of the Legion of Merit (MLM) and the Military Forces' Commendation (MFC) - Andrew Balaam was a member of the Rhodesian Light Infantry and later the Selous Scouts, for a period spanning twelve years. This is his honest and insightful account of his time as a pseudo operator. His story is brutally truthful, frightening, sometimes humorous and often sad. In later years, after Rhodesia became Zimbabwe, he was involved with a number of other former Selous Scouts in the attempted coups in the Ciskei, a South African homeland, and Lesotho, an independent nation, whose only crimes were supporting the African National Congress. Training terrorists, or as they preferred to be called, 'liberation armies', to conduct a war of terror on innocent civilians, was the very thing he had spent the last ten years in Rhodesia fighting against. This is the true, untold story of these failed attempts at governmental overthrows.

On 23 November 1977, an armada of helicopters and aeroplanes took off from Rhodesian airbases and crossed the border into Mozambique. Their objective: to attack the headquarters of the Zimbabwe African National Liberation Army, where thousands of enemy forces were concentrated. Codenamed Operation Dingo, the raid was planned to coincide with a meeting of Robert Mugabe and his war council at the targeted HQ. It would be the biggest conflict of the Rhodesian Bush War. In this fascinating account, Ian Pringle describes the political and military backdrop leading up to the operation, and he tells the story of the battle through the eyes of key personalities who planned, led and participated in it. Using his own experience as a jet and helicopter pilot and skydiver, he recreates the battle in detail, explaining the performance of men and machines in the unfolding drama of events. DINGO Firestorm is a fresh, gripping recreation of a major battle in southern African military history.

Ranged against two powerful communist terrorist armies, the small, under-equipped army of Rhodesia defied all military convention by not only resisting the onslaught, but taking the fight to the very heart of the ZIPRA and ZANLA terrorist machines. The efforts of the Rhodesian army and air force shocked the world; how could such a small force of men repel the hordes of Russian and Chinese backed communist terrorists who threatened to overwhelm them? At the very heart of the Rhodesian war effort lay the RLI. The Rhodesian light infantry Commandos were second to none. Brave, tough, resourceful, stubborn and highly trained, the exploits of the RLI soon became legend, not only in Africa but the world over. Where ever the war situation was at its most dangerous, you would almost certainly find 'The Incredibles' at the epicentre of the action. 'Stu was taking first stag and he woke Richard and me when he heard it. The voices were coming from the bush north of our location. We were unable to accurately determine distance, but estimated they were about fifty metres away. Often FRELIMO and ZANLA had little regard for noise discipline, even in circumstances such as this. So, the enemy was out here searching for us? The voices came closer then suddenly sheared off into the distance. Shortly afterwards there was more noise. Orders being issued and the clanking of unsecured kit drifted through the bush from several tens of metres away. We still couldn't see anything but it was obvious we had been overtaken and possibly encircled. In response to a question from Stu, I whispered that I didn't think the enemy knew our location. They were being far too indifferent. Had they known they would have approached cautiously, making as little noise as possible. No, they were looking for us alright, but didn't know where we were. We were on the alert now. We had about twelve hours of daylight left before we could move, plenty of time for Freddie to find us...'Commando - Shoot To Kill' is a thrilling fictional account of service with the elite Rhodesian Light Infantry during the final year of the Bush War. Peter Rische describes heart stopping behind the lines reconnaissance missions and the realities of brutal close quarters combat as he leads the reader into the heart of the bitterest conflict in sub Saharan African history.

Across Africa in the post-1956 era, the aspirations of African nationalists to secure power were boosted and quickly realized by the British, French and Belgian hasty retreat from empire. The Portuguese, Southern Rhodesian and South African governments, however, stood firm and would be challenged by their African nationalists. Influenced by the Communist bloc, these nationalists adopted the 'Armed Struggle'. In the case of Rhodesia, the Zimbabwe African People's Union (ZAPU), led by Joshua Nkomo, took this step in 1962 after their effort to foment rebellion in Rhodesia's urban areas in 1961-62 had been frustrated by police action and stiffened security legislation. Rhodesia's small, undermanned security forces, however, remained wary as Zambia and Tanganyika had given sanctuary to communist-supplied ZAPU and Zimbabwe African National Union (ZANU) guerrillas. The Rhodesians had foreseen that the northeastern frontier with Mozambique would be the most vulnerable to incursions because the African population living along it offered an immediate target for succour and subversion. The Portuguese were not seen as a bulwark as they were clearly making little progress in their counter-insurgency effort against their FRELIMO nationalist opponents. The Rhodesians were fortunate, however, that ZAPU and ZANU chose to probe across the Zambezi River from Zambia into the harsh, sparsely populated bush of the Zambezi Valley. The consequence was that the Rhodesian security forces conducted a number of successful operations in the period 1966-1972 which dented insurgent ambitions. This book describes and examines the first phase of the 'bush war' during which the Rhodesian forces honed their individual and joint skills, emerging as a formidable albeit lean fighting force.

An historic review of evidence on the Rhodesian Bush War 1965-1980. A compiling story of how identity played a crucial role in the outcome of war in Rhodesia. An in depth analysis of the conflict from a military and political prospective. The Cold War comes to life in Rhodesia.

A very different tongue-in-cheek personal account about a forgotten war. Between 1964 and 1980 Rhodesian men from all walks of life left their families and jobs to fight for their country. They were farmers, bankers, railwaymen, shopkeepers, miners and even Members of Parliament, who every six weeks, changed their soft civilian life for battle dress, rifles and grenades. These are their stories. It's not really about war heroes. It's more about bluestone charged, but still lustful troops coping with fighting terrorists, boredom, longing, fear and death. All this set against the background of Africa's sweltering heat, annoying insects, dangerous animals and venomous snakes. Definitely not for the faint-hearted. The reader will meet a long suffering prisoner-of-war, infantry soldiers, helicopter gunship pilots, tribesmen, pompous army officers, mercenaries and even a duck. Some of the personal incidents will have you laughing and crying at the same time. No matter how you view the Rhodesian Bush War, you will enjoy the humour and at times satire and even sadness of this true account of how men coped with the horrors and hardships of war.

It has been over three decades since the Union Jack was lowered on the colony of Rhodesia, but the bitter and divisive civil war that preceded it has continued to endure as a textbook counterinsurgency campaign fought between a mobile, motivated and highly trained Rhodesian security establishment and two constituted liberations movements motivated, resourced and inspired by the ideals of communist revolution in the third world. A complicated historical process of occupation and colonization set the tone as early as the late 1890s for what would at some point be an inevitable struggle for domination of this small, landlocked nation set in the southern tropics of Africa. The story of the Rhodesian War, or the Zimbabwean Liberation Struggle, is not only an epic of superb military achievement, and revolutionary zeal and fervor, but is the tale of the incompatibility of the races in southern Africa, a clash of politics and ideals and, perhaps more importantly, the ongoing ramifications of the past upon the present, and the social and political scars that a war of such emotional underpinnings as the Rhodesian conflict has had on the modern psyche of Zimbabwe. The Rhodesian War was fought with finely tuned intelligence-gathering and -analysis techniques combined with a fluid and mobile armed response. The practitioners of both have justifiably been celebrated in countless histories, memoirs and campaign analyses, but what has never been attempted has been a concise, balanced and explanatory overview of the war, the military mechanisms and the social and political foundations that defined the crisis. This book does all of that. The Rhodesian War is explained in digestible detail and in a manner that will allow enthusiasts of the elements of that struggle - the iconic exploits of the Rhodesian Light Infantry, the SAS, the Selous Scouts, the Rhodesian African Rifles, the Rhodesia Regiment, among other well-known fighting units - to embrace the wider picture in order to place the various episodes in context
